

The logo features the word "LEGO" in its classic white font with a black outline on a red background. To the right, the word "SYSTEM" is written in a white, rounded, bubbly font with a thick yellow outline. A single red 1x4 LEGO brick is placed on top of the letter 'Y' in "SYSTEM". The background of the right side is light blue with various other LEGO bricks scattered around.

All the models that are shown come from LEGO SYSTEM FreeStyle, our many themes including Town, Pirates, Aquazone, Castle, Space and some wacky models that are constructed from a variety of LEGO bricks and elements.

You may not be able to build everything exactly to the model shown but build anyway. It does not matter if there are a few elements that are different. The most important thing is to have lots of fun using your LEGO bricks and elements in new ways. Enjoy!

Auf den nächsten Seiten wirst du tolle und spannende Ideen entdecken, wie du mit LEGO® Elementen bauen und spielen kannst. Die Modelle, die hier gezeigt werden, sind mit Elementen aus dem LEGO SYSTEM FreeStyle Programm und den Spielwelten LEGO SYSTEM Stadt, Piraten, Aquazone, Burg und Raumfahrt gebaut. Außerdem haben wir einige lustige, spaßige Modelle aus ganz verschiedenen Elementen entwickelt.

Dabei macht es überhaupt nichts, wenn du einmal einige Teile anders baust, sollte ein Element gerade nicht zur Hand sein. Das Wichtigste ist, du hast Spaß und Freude, deine LEGO Steine auf immer wieder neue Weise zusammenzusetzen. Und dazu möchte dich dieses LEGO Bauspielspaß-Buch anregen.

In dit boek vind je allerlei leuke en interessante LEGO® bouwideo's. Alle modellen zijn gebouwd met LEGO elementen uit de LEGO SYSTEM FreeStyle serie en uit de bekende themalijnen Miniland, Piraten, Aquazone, Riddertijd en Space. Ook zijn er te gekke bouwvoorbeelden van modellen die zijn opgebouwd uit elementen uit heel veel verschillende series! Misschien kun je niet alle modellen precies zo bouwen als op het voorbeeld. Bijvoorbeeld omdat je niet alle elementen hebt die in het voorbeeld gebruikt worden. Je modellen worden net zo mooi en misschien zelfs nog wel mooier als je een andere LEGO stenen gebruikt. Het belangrijkste is dat je veel plezier beleeft aan het spelen en bouwen met je LEGO stenen. Veel succes!

Tästä kirjasta saat aivan uudenlaisia LEGO® rakennusvinkkejä ja ideoita mitä mielikuvituksellisiin leikkeihin, joita voit leikkiä itse rakentamillasi malleilla. Kaikki kirjassa esiintyvien mallien elementit ovat peräisin joko LEGO SYSTEM FreeStyle, Kaupunki, Merirosvo, Aquazone, Linna tai Avaruus-rakenteista. Jotkut kaikkein huikeimmat mallit on rakennettu erilaisista LEGO peruspaloista ja elementeistä. Et voi vammaankaan rakentaa kaikkia malleja aivan tarkalleen mallikuviamme kaltaiseksi, mutta ne ovatkin vain suuntaa-antavia ideoita eivätkä valmiita rakennusohjeita. Jos jollakin elementillä puuttuu omasta palikkakokoelmastasi, jätä ne pois rakennelmastasi tai korvaa ne vastaavilla muilla palikoilla. Tärkeintä onkin rakentaa omia malleja ja omia sovellutuksia ja pitää hauskaa.

Puedes construir cada modelo como quieras, no tiene que ser exactamente como se muestra en la foto pero lo importante es construir. No importa si algunos elementos son distintos a los que mostramos. Lo más importante es divertirse al utilizar los ladrillos y elementos LEGO en la forma que quieras y que más te guste. ¡Que te diviertas!

När du öppnar den här boken öppnar du en hel värld full av utmanande och fascinerande idéer till LEGO® modeller. Alla avbildade modeller är byggda med klossar från LEGO SYSTEM FreeStyle eller med klossar från någon av våra temaaskar: Stad, Pirater, Aquazone, Borg eller Rymd. Dessutom finns det några knepiga modeller med klossar från lite olika askar. Dina egna byggen kanske inte blir precis som på våra modeller beroende på vilka klossar du har. Men det är inte så nog utan låt dig inspireras och upptäck hur roligt det är att bygga med LEGO klossar på egen hand.

I denne bog får du nye, spændende idéer til bygning og leg med LEGO® klodser. De viste modeller er bygget af klodser fra LEGO SYSTEM, FreeStyle eller fra temaerne: By, Pirat, Aquazone, Borg, Space. Der er også nogle fantasifulde modeller, som er bygget af klodser fra flere forskellige temaer. Du har måske ikke alle klodser til de modeller, vi har vist, men byg alligevel. Det betyder ikke noget, hvis nogle af klodserne er forskellige fra de viste. Det vigtigste er, at du har det sjovt med dine LEGO klodser på en ny måde. God fornøjelse!
